

MEDIA RELEASE

Donald Projects Completed

7 December 2016

Buloke Shire Council has recently completed a number of important local projects in the Donald community.

Construction of new storage space at the Donald Archives for historical community records has been an important community project. The project, funded through Regional Development Victoria and Buloke Shire Council, has provided a modern airtight space for the Donald History and Natural History Group to house historical documents.

Foletti Park has undergone a series of upgrades over the past six months which have reinvigorated the area. The redevelopment of the entry way and the installation of a new BBQ have provided a welcoming and user friendly environment for locals and tourists alike.

Additional upgrades including new concrete pathways and improvements to the disabled toilet have created improved accessibility for older and disabled members of the community.

Regional Development Victoria along with Buloke Shire Council have funded these much needed works, which have enhanced the aesthetics of the park with a focus on the natural beauty of the lake.
